3.2 Maintenances to be done in OBVAM

1. Maintain ECA system in common core for FCUBS.

Menu: Core Maintenance-> ECA System -> Create ECA System

The screenshot shows the 'ECA System' form. At the top, there is a title bar with 'ECA System' and a 'Print' button. Below the title bar, there are two input fields: 'Source System' and 'Description'. The main body of the form is a large, empty area with a light gray background pattern. At the bottom left, there is an 'Audit' button.

2. Common Core External Customer should replicate the 'Real Customer' from FCUBS. In addition, the source system should be one created in step 1.

Menu: Core Maintenance ->External Customer -> Create external Customer

The screenshot shows the 'External Customer' form. At the top, there is a title bar with 'External Customer' and a 'Print' button. Below the title bar, the form is divided into several sections. The 'Customer Details' section includes fields for 'Customer Number', 'Source Customer ID', 'Access Group', 'Customer Name', 'Source System', 'Short Name', 'Customer Category', 'Customer Type' (with a dropdown menu showing 'Individual...', 'Corpor...', and 'Bank'), and 'Relationship Manager ID'. The 'Address' section includes fields for 'Address Line 1', 'Address Line 2', 'Address Line 3', 'Address Line 4', 'Country', and 'Postal Code'. The 'Other Details' section includes checkboxes for 'Deceased', 'Walk-in Customer', 'Frozen', 'Staff', 'Whereabouts Unknown', 'Language', 'Sanction Check Required', and 'Nationality'. At the bottom left, there is an 'Audit' button.

3. Common Core 'External Account' should replicate the 'Real Account' from FCUBS. In addition, here, the "External Credit Approval System" should be the source system maintained in step 1.

Menu: Core Maintenance ->External Customer Account -> Create External Customer Account

External Customer Account Print

5. Maintain valid transaction code from FCUBS

Menu : Core Maintenance ->Transaction Code-> Create Transaction Code

The screenshot shows the 'Transaction Code' form. It has a title bar with 'Transaction Code' and a 'Print' button. The form contains four input fields: 'Transaction Code', 'Description', 'Source System' (with a search icon), and 'Source Transaction Code'. There is an 'Audit' button at the bottom left.

6. Maintain external DDA details (i.e., WSDL links for web services required to post a transaction) as below.

Menu –Virtual Account Management ->Configuration ->External DDA System -> Create External DDA System

- Pick DDA offset GL maintained in common core external chart.
- Give valid user ID for the system to login to FCUBS successfully.

The screenshot shows the 'External DDA System' form. It has a title bar with 'External DDA System' and a 'Print' button. The form is divided into two main sections: 'ECA System' and 'System Preferences'. The 'ECA System' section has a single input field. The 'System Preferences' section has a 'Default Offset GL' input field and a toggle switch for 'EAC Required', which is currently turned on. There is an 'Audit' button at the bottom left.
